Summary

 front-end developer specializes in developing applications and websites and designing user interfaces that are attractive and interactive with the user. I am proficient in programming languages such as HTML, CSS, JavaScript,Vue3.js and framework for css like (Bulma,Bootstrap,tailwind), and I have good knowledge of JQuery.

Experience

Front-end design and development training : 03/2021 to 11/2023
This course consisted of three levels:

Basic level:
   HTML/ CSS/JavaScript/Bulma is a CSS framework /Git & GitHub.

Advanced level:
Vue.js: is a JavaScript framework for building user interfaces
Vuetify: Its goal is to build rich and attractive user interfaces.
Pinia: it allows you to share state across components/pages.

Business Ethics:
How to employ ethics such as honesty, integrity, justice, transparency, respect for others, and social responsibility at work. Adhering to ethical standards can help companies build trust with stakeholders, enhance their reputation, and contribute to long-term success.
